CMT **CHARCOT-MARIE-TOOTH DISEASE IS**

A progressive neuromuscular disease that kills the nerves in the lower legs, feet, and hands, causing the muscles around them to atrophy. It affects an astounding 1 in 2,500 people, & is currently incurable.

The Charcot-Marie-Tooth Association is dedicated to:

- Supporting the development of new drugs to treat CMT
- Improving the quality of life for people with CMT
- Funding research to find a cure
